PROFESSIONAL SUMMARY

Full stack and AI-focused software engineer with hands-on production experience in LLM integration, multi-agent systems, and full-stack development. Built a 4-agent LangGraph research pipeline, lifted Lighthouse scores across a production site, and placed 2nd among 20+ GIKI teams at ICPC Regionals (100+ teams). Stack: React, Next.js, FastAPI, Python, AWS, Docker, LLMs. Open to SWE and AI roles where end-to-end ownership matters

EDUCATION

Ghulam Ishaq Khan Institute of Engineering Sciences & Technology

September 2023 – May 2027

Bachelor of Science | Computer Science

Relevant Courses: Software Engineering, Databases, DevOps, Computer Networks, Operating Systems, OOP, DSA, Algorithm Analysis, Machine Learning

WORK EXPERIENCE

Software Engineer Intern

July 2025 – September 2025

Software Productivity Staregists

Led full redesign of a 15-page production site, owning design through delivery - from Figma prototyping to stakeholder sign-off to React implementation.

- **Redesigned** a 15-page company website using React and Tailwind CSS, improving Lighthouse Performance by **98%** and SEO by **10%**.
- **Implemented** SEO and performance best practices (lazy loading, semantic HTML, meta optimization), increasing Accessibility by **19%** and Best Practices by **21%** across the full site.
- **Collaborated** with a 5-member team using Git branching and PR workflows, ensuring clean version-controlled delivery
- **Prototyped** the full redesign in Figma, securing stakeholder sign-off before development, eliminating scope changes mid-build

FEATURED PROJECTS

InterviewIQ – AI-Powered Interview Coaching Platform

April 2026

- Built a full-stack interview preparation system using Next.js, FastAPI, and Supabase, featuring real-time speech transcription via Groq Whisper API and LLM-generated question banks across **6+ job roles** with 7 questions per session
- Designed a session tracking system storing per-answer speech metrics, emotion scores, and coaching events across sessions to quantify candidate improvement over time

CI/CD Pipeline - Dockerized Multi-Service App on AWS

May 2026

- Engineered end-to-end GitHub Actions CI/CD pipelines for a full-stack app (React + Node.js) across **3 AWS EC2 environments** (Dev, Testing, Staging) with container orchestration, automated build, ESLint analysis, unit testing, and email notifications on success/failure
- Containerized all services with Docker Compose, pushed images to AWS ECR, and configured IAM roles for secure credential free pulls. Enforced branch protection across all environments

Company Research Agent – Multi Agent LangGraph Pipeline

April 2026

- **Engineered** a 4-agent autonomous pipeline (Clarity → Research → Validator → Synthesis) using LangGraph with human in the loop clarification
- **Integrated Tavily** web search and Groq LLM for real-time research with confidence scoring (0–10). Validator agent loops research up to **3 retry** attempts on insufficient results before routing to a Synthesis agent that generates structured markdown reports

TECHNICAL EXPERTISE

Languages: Python, JavaScript, TypeScript, SQL, Bash

Frameworks & Libraries: React, Next.js, FastAPI, Node.js, Tailwind CSS

Cloud & DevOps: AWS (S3, EC2, ECS), Docker, GitHub Actions, Terraform, Linux, Bash Scripting

Databases & Tools: PostgreSQL, SQLite, Supabase, Git, VS Code, Jupyter Notebook

AI/ML: Supervised Learning, Classification, Regression, KNN, SVM, Ensemble Methods

LEADERSHIP EXPERIENCE & CO CURRICULAR ACTIVITIES

Microsoft Club GIKI – Development and Marketing

2024 - Present

- Developed university software i.e. ORIC Dashboard for **100+** professors in university to display their researches
- **130+ participants** across a 36-hour inter-university hackathon. Co head end-to-end event delivery including planning, sponsor acquisition, and day-of logistics
- Led promotional efforts with a team of 10, increasing signups by **40%** compared to the previous year

ACHIEVEMENTS & RECOGNITION

- **2nd Place** | ICPC Regionals Onsite (2025) - ranked 2nd among 20+ GIKI teams and 21st among 100+ teams regionally
- **Runner-Up** | Agentic AI Hackathon (2025) - GDGOC GIKI
- **3rd Place** | AI Hackathon - Hack at GIKI (2026), competed against 50+ participants
