

EDUCATION

Ghulam Ishaq Khan Institute of Engineering Sciences and Technology (GIKI)

Bachelors of Science - Computer Science; CGPA:3.00

Core Courses

Data Structures and Algorithms, OOP, Database Systems, Inferential Statistics and Probability, Linear Algebra, Discrete Mathematics, Theory of Automata, Operating Systems, Machine Learning, Computer Architecture

Topi, Pakistan

Sep 2023 - May 2025

WORK EXPERIENCE

FRONTEND INTERN | SPS |

July 25-September 25

- Revamped and modernized the SPS website using **React** and **Tailwind CSS**, improving UI/UX and overall performance.
- Implemented **SEO best practices** to enhance visibility and optimize page load speed
- Applied **version control (Git/GitHub)** to collaborate efficiently with a 5-member development team.
- Partnered with the backend team to define requirements and ensure seamless integration
- Designed a **prototype** to validate features before implementing the final product.

PROJECTS

Rahgir - Ride Booking Web Application

March 25 – May 2025

- Developed a city-wide ride booking platform allowing users to schedule rides efficiently
- Integration of real-time traffic data into the ride booking algorithm and improved route efficiency
- Tech Stack: Flask, Html, CSS, Javascript

Pulse - AI Powered Productivity App

November 25 - Dec 2025

- Built an AI-powered productivity platform focused on single-task focus, smart scheduling, and habit optimization.
- Implemented intelligent **schedule generation** by analyzing user behavior patterns and task history to recommend optimized daily plans
- Developed a scalable **full-stack** architecture with a modern frontend and API-driven backend, ensuring clean separation of concerns.

Learning Management System

July 23- August 2023

- Built a grading tool that processes student marks from CSV and generates results using mean, median, and standard deviation.
- Includes login dashboards for instructors, students and administration
- Processed grades accurately for datasets of up to **500** students
- Developed using Python (Flask), HTML, CSS, JavaScript.

SKILLS SUMMARY

- Languages:
- Frameworks:
- Tools:
- Platforms:
- DevOps
- AI/ML:

Python, SQL, C++, Javascript

Pandas, Numpy, Matplotlib, React, Fast API, Flask

SQLite, PgAdmin4, Git, Github, Linux, scikit-learn, NumPy, Pandas, Matplotlib

Jupyter Notebook, Visual Studio Code, Google Collab

Docker, Kubernetes, Terraform, AWS, GitHub Actions, Jenkins, CI/CD, Bash Scripting

Supervised Learning, Classification, Regression, Decision Trees, KNN, SVM, Ensemble Methods (Bagging/Boosting)

LEADERSHIP EXPERIENCE

Microsoft Club GIKI - Micathon SubHead

April 2025

- Co-led a 1-day hackathon with **90+ participants**; handled event planning and logistics
- Led promotional efforts by designing social media content, increasing **signups by 40%**.

GIKI Mathematics Society - APMO SubHead

May 2025

- Contributed in organizing Pakistan's largest student-led math olympiad with **200+ participants** from nationwide institutions.
- Coordinated a **10-member team** and oversaw logistics, promotions, and event operations.

ACHIEVEMENTS / CERTIFICATES

- Stood **2nd** among GIKI teams in **ICPC** Onsite Round.
- Runner Up** in **Quantum Computing** Hackathon conducted by **GDGOC** GIKI
